

## ■ The Legend of Korra – PC Default Keyboard & Mouse Controls

=====

### ■ Movement & Camera

-----

W, A, S, D → Move Korra (W=forward, A=left, S=backward, D=right)  
Mouse → Move the camera around Korra (aim & look around)  
R (sometimes Q/E) → Lock-on to an enemy (focus camera on target)

### ■ Basic Combat

-----

Left Mouse Button → Light Attack (quick strikes, fast combos)  
Right Mouse Button → Heavy Attack (slower, stronger attacks)  
Mouse Scroll Wheel → Switch Bending Element (Water, Earth, Fire, Air)  
C → Counter / Perfect Guard (parry enemy strikes, counterattack)  
Shift → Dodge / Evade (quick roll/flip to avoid attacks)

### ■ Movement Actions

-----

Spacebar → Jump (combine with attacks for aerial combos)  
W + Spacebar → Forward leap (engage enemies, jump gaps)

### ■ Advanced Combat / Specials

-----

R (or Middle Mouse Button) → Lock-On Target  
Q → Spirit Attack (special bending attack, consumes chi)  
C + V (or combo) → Avatar State (unlocks later, Korra glows, all attacks boosted)

### ■ Items & Menus

-----

Number Keys (1–4) → Use items (potions, etc.)  
Esc → Pause/Menu (inventory, skills, settings)

### ■ Naga Riding Mini-Game

-----

W, A, S, D → Steer Naga  
Shift → Slide under obstacles  
Spacebar → Jump obstacles  
LMB/RMB/Scroll → Use bending powers

### ■ How It Feels in Practice

-----

- WASD + Mouse for main movement/combat
- LMB/RMB = core combos
- Scroll Wheel = swap bending mid-combo
- Shift (Dodge) + C (Counter) = survival keys
- Works best with an Xbox-style controller (use x360ce if needed)
